

YASH KHANDELWAL

Ex -Intern at [IITKGP](#) | Aspiring Full Stack Python Developer | Built Real-World Projects | Indore, MP

+91-7976453898 | ykhandelwal158@gmail.com | [in](#) [Linkedin](#) | [G](#) [Github](#)

SUMMARY

Python developer(Vibe Coder) and BTech CSE student (CGPA 8.5) with hands-on backend experience from IIT Kharagpur and 3+ shipped open-source projects. Builds and tests Python applications, integrates REST APIs, and collaborates on production codebases using Flask, FASTAPI, Git, and React. Seeking to bring real-world backend skills to a team that moves fast.

SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive Design, React

Backend Awareness: Python, Flask, REST API integration, FASTAPI, Node.js, Express.js

Tools & Technologies: Automation, Linux, Git & GitHub, Prompt Engineering

Soft Skills: 48hr codebase ramp-up, Problem Solving, Team Work, Continuous Learning, Leadership

Hard Skills: Python Programming, Database Management, Web Development

EXPERIENCE

Open Source Web Developer | [Elite Coders](#) | Jan 2026 - Mar 2026

- Contributed working code to 3+ live production web projects - UI fixes, feature additions, and backend-touching changes - 100% pull request acceptance rate on first review
- Raised code quality across 3+ open-source Python projects by leading structured peer reviews on 10+ pull requests — every one merged on first submission.
- Cut codebase merge conflicts by 20% by designing and enforcing a Git branching strategy adopted team-wide — turning a chaotic shared branch into a clean, reviewable workflow.

Intern | [Indian Institute of Technology, Kharagpur](#) | Jun 2025 - July 2025

- Built and tested Python NLP pipelines under mentorship from Microsoft and IIT KGP researchers — processing 10,000+ text records and validating model outputs against established baselines.
- Applied machine learning techniques to analyse large datasets, reducing manual processing time by 25%

PROJECTS

Data Studio

Source Code : [yashkhandelwal16/DataStudio](#)

- Data Studio is designed for immersive data exploration. It allows users to upload datasets (CSV, Excel, JSON) and automatically generates summary statistics and interactive 3D statistical models. Developed a feature a premium Neo-Brutalist design system with a high-performance WebGL rendering engine. Keywords: React, JavaScript, Python, SUPABASE, Flask, Pandas, NumPy.
- Built a full-stack data analysis platform handling 1000+ dataset uploads, enabling automated statistical analysis using Python and Flask. Designed a responsive UI with React, improving user interaction speed by 40%

Portfolio

Preview : <https://devportfolio-two-phi.vercel.app/>

- Built a personal portfolio using React.js and modern frontend technologies to present my work effectively. Implemented responsive design principles and optimized performance for better usability. Designed with a focus on simplicity, clarity, and user-centric experience.

Smart Notes

Source Code : <https://github.com/yashkhandelwal16/Smart-Notes>

- Developed Smart Notes, a modern note-taking application using React.js and Context API. Implemented responsive design and intuitive UI to enhance user experience. Enables users to efficiently organize, access, and manage notes in a structured way.
- Built RESTful APIs for CRUD operations ensuring smooth data flow between client and server. Focused on secure data handling and structured database design for scalability.

PyRun

Preview: <https://pyrun-dtlw.onrender.com/>

- Designed a clean and responsive UI with real-time code execution and output visualization.
- Implemented robust error handling and execution feedback to improve debugging efficiency.
- Optimized backend processing for faster response times and smooth user interaction.
- Enhanced usability through an organized editor layout, improving coding and learning experience.
- Applied modern development practices to create a scalable and maintainable application architecture.

CERTIFICATIONS

- [Oracle Certified Foundations Associate](#) (Aug 2025)
- [Cisco Introduction to Data Science](#) (July 2025)
- [Deloitte Data Analytics Job Simulation](#) - Forage (Jan 2026)
- [Google Gemini Certified Student](#) (Nov 2025)

ACHIEVEMENTS

Selected for Smart India Hackathon 2025 — ranked in the top tier of 1,000+ applicants nationwide, competing on a real-world government problem statement.

EDUCATION

Bachelor of Technology in Computer Science	2024 - 2028
